

1	AIDP	It is an autoimmune (immune system destructed by their own cell) process that is characterized by progressive weakness and paralysis of muscle of leg
2	AIDS / HIV	disease in which there is severe loss of body's cellular immunity, greatly lowering the resistance to infection and malignancy caused by HIV virus
3	AIS - Acquired Im Syndrome	HIV virus causes AIDS and interferes with the body's ability to fight infections
4	Sexually Transmitted Diseases Bacterial	They Include Aids, Chlamydia, Genital Herpes, Genital Warts, Gonorrhea, Syphilis, And Some Forms Of Hepatitis. Abbreviated Std Or Sti. Also Referred To As Sexually Transmitted Infections.
5	AIDS_1	A Disease In Which There Is A Severe Loss Of The Body'S Cellular Immunity, Greatly Lowering The Resistance To Infection And Malignancy Caused By Hiv Virus.
6	AIDS_2	A Disease In Which There Is A Severe Loss Of The Body'S Cellular Immunity, Greatly Lowering The Resistance To Infection And Malignancy Caused By Hiv Virus.
7	AIDS_Kaposi_sarcoma	Epidemic (Widespread Occurance Of An Infectious Disease) (Aids-Related) Kaposi Sarcoma. ... When Hiv Damages The Immune System, People Who Also Are Infected With A Certain Virus (The Kaposi Sarcoma Associated Herpesvirus Or Kshv) Are More Likely To Develop Ks. Ks Is Considered An “Aids Defining” Illness.
8	AIDS_secondary	A Disease In Which There Is A Severe Loss Of The Body'S Cellular Immunity, Greatly Lowering The Resistance To Infection And Malignancy Caused By Hiv Virus.
9	Vitamin A Deficiency	Not enough vitamin A in the body which can cause blindness with night blindness, dry skin and frequent infections
10	Vitamin B12 Deficiency	Anemia or nervous system injury from lower than normal amounts of vitamin B12 with fatigue (feel lack of energy),numbness (decreased sense of touch),poor balance and memory trouble
11	Vitamin B Deficiency	Not enough vitamin B in the body which leads to weakness, fatigue (feel lack of energy),light headedness, rapid heartbeat and breathing and pale colour of skin
12	Vitamin C Deficiency	A condition caused by a severe lack of vitamin C in the diet which leads to; bruising, bleeding

		gums, weakness, fatigue (feel lack of energy) and rash (small red spots on skin) also called scurvy
13	Vitamin D Deficiency	Too little vitamin D in the body which leads to thin, brittle, or misshapen bones and muscle weakness
14	Vitamin Deficiency	A deficiency of one or more essential vitamins like vitamin A,B,C,D etc which leads to various health problem to the human body
15	Autoimmune Disease	an illness that occurs when body tissues are attacked by its own immune system. The immune system is a complex organization within body that is designed normally to “seek and destroy” invaders of the body, including infectious agents
16	Autoimmune Poly C.E.D	A disease in which the body's immune system attacks healthy cells of many hormone producing glands
17	Autoimmune Poly-glandular	In this disease multiple endocrine (hormone producing) gland affected causing low hormone production. Symptoms are loss of hair, decrease in sex hormone, cramping of muscle due to low calcium etc
18	Autoimmune Thyroiditis	In this condition, the thyroid gland present in neck is usually enlarged and has a decreased ability to make thyroid hormones
19	Autonomic Failure	It occurs due to imbalance between the sympathetic (A part of the nervous system that accelerate the heart rate, constrict blood vessels, and raise blood pressure)and parasympathetic(involuntary nervous system that serves to slow the heart rate and relax the sphincter muscles) system
20	Autonomic Nervous System	It is a control system that regulates bodily functions such as the heart rate, digestion, respiratory rate, papillary response, urination, and sexual arousal with in brain
21	Immune Complex Diseases	It is caused by the deposition of antigen-antibody or antigen-antibody complement complexes on the surface of cells, resulting in the development of chronic or acute, inflammation (reddened, swollen)
22	Immune System Diseases	cause abnormally low activity or over activity of the immune system in which the body attacks and damages its own tissues
23	Immunodeficiency AIS	acquired immunodeficiency syndrome(AIDS) is most advanced stage of HIV infection which

		interferes with the body's ability to fight infections
24	Immunodeficiency Severe	It is a life-threatening syndrome of recurrent infections, diarrhea, dermatitis (inflammation of skin),and failure to thrive
25	Immunologic Deficiency Syndromes	It is a condition in which there is a loss of or defect in a component of the immune system
26	Immune_system_stabilization_TR	Cause Abnormally Low Activity Or Overactivity Of The Immune System In Which The Body Attacks And Damages Its Own Tissues
27	Immune_system_stimulation	Cause Abnormally Low Activity Or Overactivity Of The Immune System In Which The Body Attacks And Damages Its Own Tissues
28	Immune_system_stimulation_1	Cause Abnormally Low Activity Or Overactivity Of The Immune System In Which The Body Attacks And Damages Its Own Tissues
